EDUCATION

Raghu Engineering College

Visakhapatnam, India

Bachelor of Technology in Computer Science and Engineering

2023 – Present | **CGPA:** 8.2 / 10.0

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript (ES6+), SQL

Backend & Security: Spring Boot, REST APIs, Spring Security, JWT, OAuth2, Spring Data JPA/Hibernate, Maven

Frontend & Web: React, Tailwind CSS, HTML5, CSS3, Web Storage API

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS)

Developer Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

Python Full Stack Developer Intern | AICTE - EduSkills

April 2025 – June 2025 | Remote, India

- Completed a 10-week technical internship building full-stack web application modules with Python, SQL database scripts, and RESTful routing.
- Engineered client-side and server-side form validations and integrated relational queries to manage backend data operations smoothly.
- Awarded **Outstanding (Grade O)** rating based on performance in module assessments and practical project evaluations.

PROJECTS

Campus Placement Management System

Java, Spring Boot, Spring Security, JWT, OAuth2, MySQL, Git

- Designed and built RESTful backend APIs in Spring Boot to automate recruitment workflows, company job postings, and student application tracking.
- Implemented role-based authorization and user authentication using Spring Security with JWT for stateless session management and OAuth2 integration.
- Integrated Spring Data JPA/Hibernate and MySQL for database persistence, entity relationship mapping, and automated CRUD operations.

Employee Management System

React, JavaScript, Tailwind CSS, HTML5, Git

- Developed a responsive single-page application (SPA) in React and Tailwind CSS for employee record management and dynamic directory updates.
- Built modular React UI components with client-side form validation and state management for dynamic data entry.
- Utilized native browser **localStorage** API to persist employee state across sessions without external server dependencies.

Data Structures & Algorithms Repository

Java, Git

- Solved and maintained Java implementations for **140+ LeetCode problems** covering Arrays, Strings, Linked Lists, Trees, and Dynamic Programming.
- Analyzed and documented time (**O(N)**, **O(log N)**) and space complexities (**O(1)**, **O(N)**) for each algorithm in clean, modular code.

CERTIFICATIONS

- Java Programming & Data Structures** — ScholarHat
- GenAI for Professionals** — Udemy
- Principles of Generative AI** — Infosys Springboard
